Subject: MICROSOFT SETTLEMENT

Department of Justice:

Please let Microsoft get on with their company business. Enough is enough. I feel all of us need to get on with the business of this country. I am hopeful that Microsoft and others may develop systems to help us ferret out the evil people who are trying to kill us and destroy our country. They can't do this while fighting for their very being, let alone the cost of lawsuits. I hope you will do whatever is necessary to encourage the states still trying for more punishment to cease actions.

God Bless America. She needs everyone to join the fight and not be fighting each other. Thank you.
